Construction works in Progress in – Kuwait International Airport (OKKK)

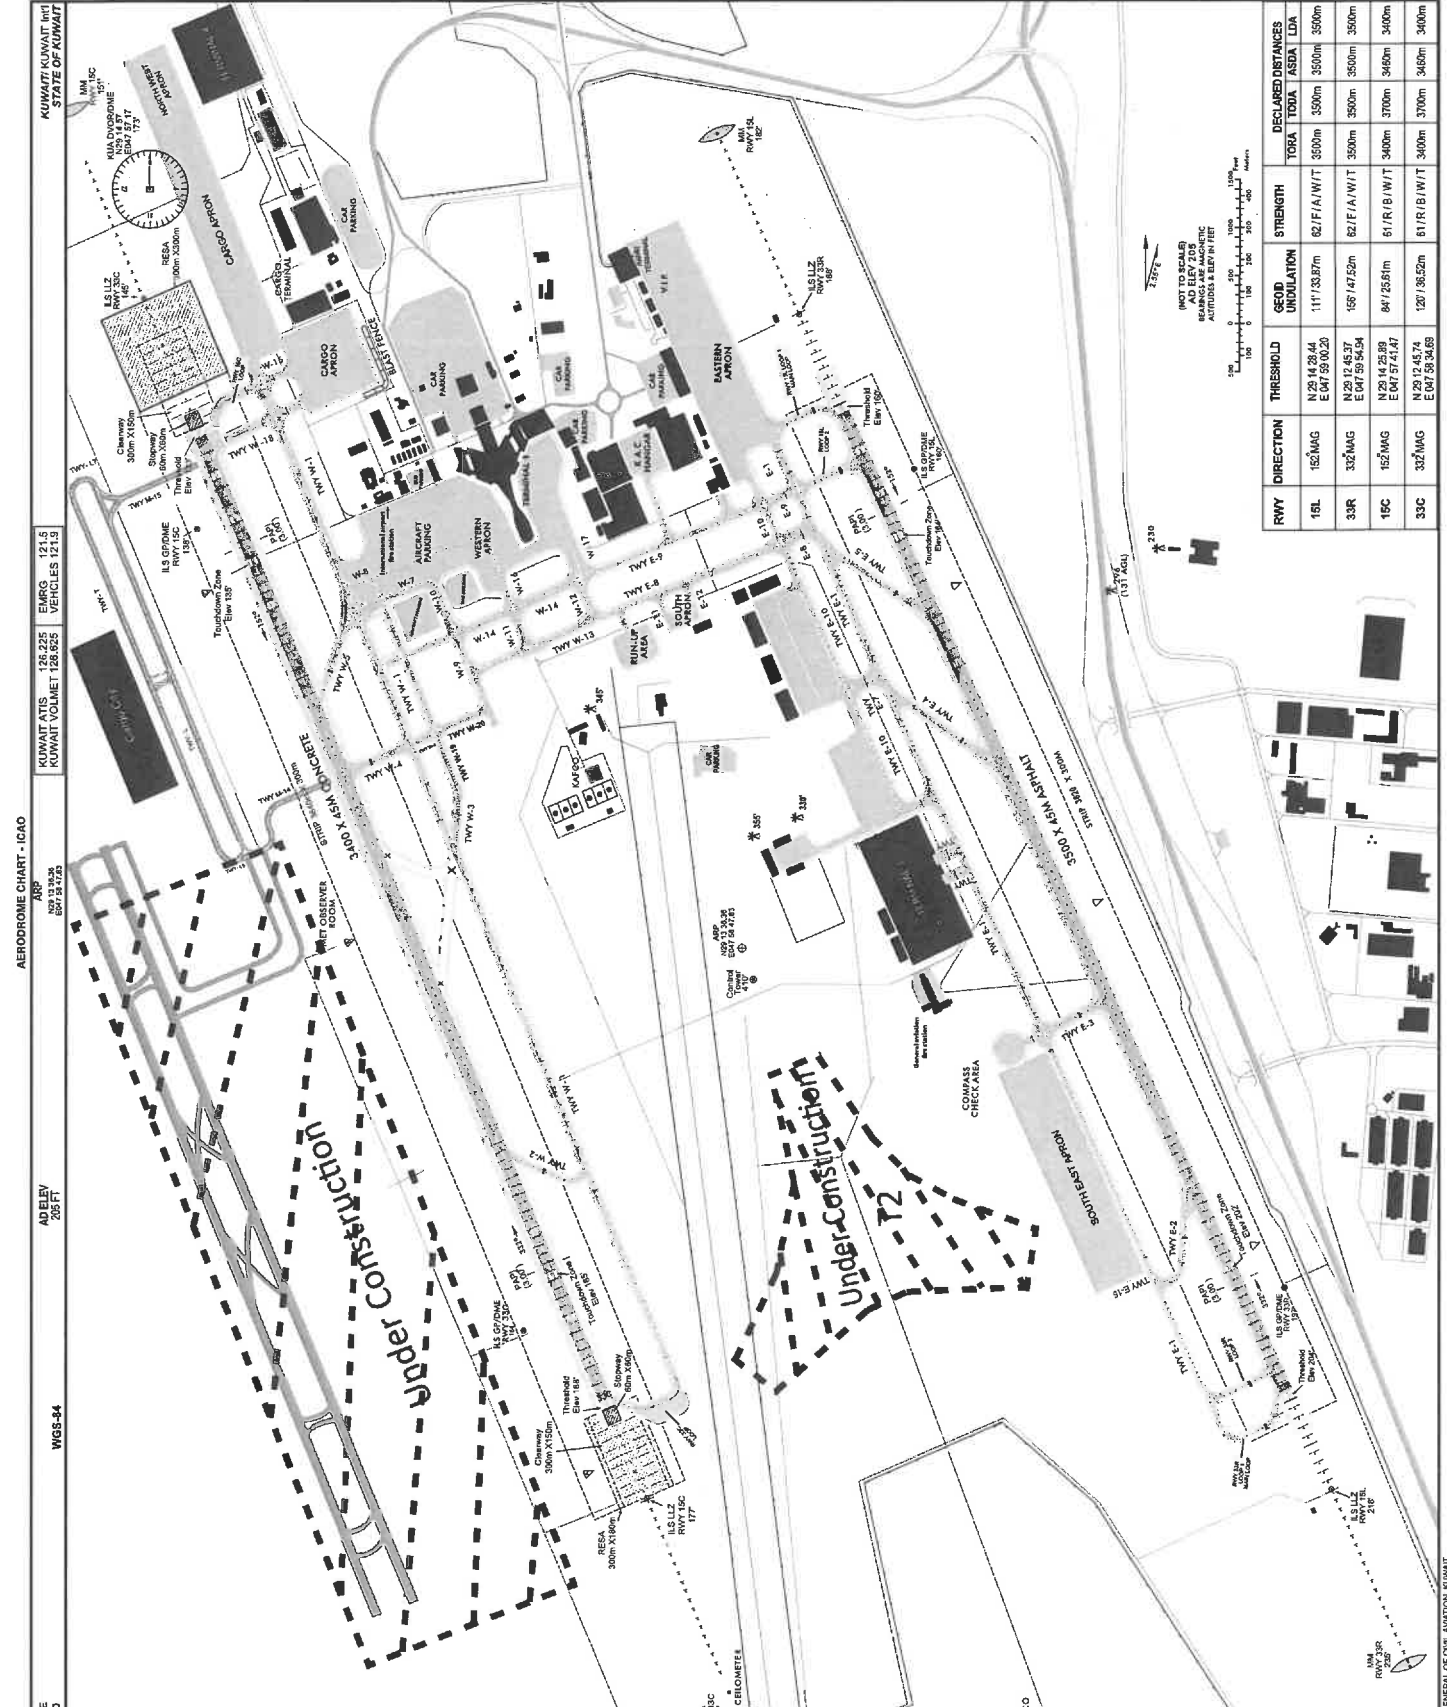

This Aeronautical Information Circular (AIC) holds information on the construction activities for a number of projects associated with the Kuwait International Airport Master Plan 2012 . The main construction activities are:

New Parallel Runway (NPR) to the West of the existing runways;
Associated taxiways and infrastructure;
New Terminal building T2 and associated infrastructure, aprons, and taxiways;
New Air Traffic Control Tower;
Refurbishment of Western Cargo Apron;
Future refurbishment of existing runways and taxiways.

The attached Aerodrome diagram is for information only and is not to be used for navigation. The intent of this AIC is to alert all users of Kuwait International Airport to the coming changes, in time for operators to do the necessary changes to their documentation and procedure

NOTE : AIC 02/22 is hereby cancelled .
